What is a Forever device? These are improved versions of Basic Ovens, Stoves and Grills. The improvement is that food cooked on them is never spoiled. What is a Sonic device? These are improved versions of Basic Ovens, Stoves and Grills. The improvement is that food takes 20% less time to cook. For example, a 1 day recipe will take only 17 hours, 36 minutes to cook (remember that 1 day recipe normally takes 22 hours to cook). What does it mean to master a recipe? This involves cooking a recipe repeatedly to fill up the meter along the bottom of the dish in the recipe book. The number of times a dish must be cooked to master at each level and the rewards to do so are as follows: MasteryLevelNumber of DishesReward182,000 coins and 50 XP3434,000 coins and 100 XP4831 bead and 200 XPHow do I unlock Apple Cider on Drinks Machine? You can't. This recipe was part of the Christmas meal in 2011, and if you don't unlock it by in them at that time, then you can never unlock it. The same goes for other case goals such as Holiday Ham, and also many recipes that have been removed completely such as Pumpkin

Porridge and Christmas Pear Torte. How do I move the door? There must always be a door placed in your restaurant, so to move it you need to buy another door for 10 beads in the wall decorations tab. Then place it wherever you want and store the other door. How do I remove wallpapers and floor tiles that I had previously purchased? Unfortunately, you can't. You can only place different wallpaper or floor tiles over the existing ones, which will result in the originals being transferred to storage. What are the boxes in the last tab? This is a lottery. For 24 gems you will get a lucky dip in the box and will be given an item at random. But some items are more common than others. I strongly urge you to take a look at the contents of the boxes before parting with some gems by visiting. If I have enough coins or gems, can I skip an expansion and move straight to the next? No. You must apply each expansion in order. How do I get the flowers needed to complete the Floral Bouquet in the Collectibles section? Each of the flowers appears when you buy wallpapers and wall decorations. But they are very rare going forward. I can only suggest buy a lot of wallpapers and watches! Why are there no more targets? Targets are released only occasionally, and not according to any time frame. Their release is usually related to the time of year (e.g. Christmas, Valentine's Day, Summer). If any are currently active, they will be listed on the right side of this page. Why do some of my neighbors' requests appear only to me 2 days after they were made? This depends on your neighbor. Players can only make 20 gift requests per day, so if they do more, then those that are not accepted are first transferred to the next day. If they make more than 40 requests, those who haven't responded are carried over to a third day, and so on. How do I use pictures in messages for neighbors? To do this, you need to download a program outwith Restaurant Story (or TeamLava). The most widely used app for this is called Emoji and can be found (UK App Store). I see your explanation for gifting. Does food apply to the 20 threshold? I'm told by my neighbors that my gifts are full and they don't go through. But I get presents for food all the time. I decline the food gifts in the hope that the slot (of the 20 threshold) will be reopened. But I still hear from them saying that it still wont go through? What gives on this? If the food is not affected by the 20 threshold then I will continue to accept it. It seems that I have turned away good gifts for nothing?? Thanks again! Arc Rise Fantasia is a product of old and new, combining wonderful graphics with modern gameplay while bringing classic Japanese high fantasy role-playing action involving blimps and dragons, exclusively to the platform. Players will jump into the shoes of L'Arc, a calm and composed mercenary, aiming to defend Empire from an impending invasion invasion ferocious creatures. About Genre RPG Rating Rated 'T' for Drug Reference, Fantasy Violence, Mild Suggestive Themes, Simulated Gambling Summary From Image Epoch, the team that created the strategy RPG Luminous Arc, comesan epic RPG exclusively developed for the Wii. Arc rise fantasia rum. For some insight! I have a technical question you may know the answer to; I've transferred someone else's Storm8 game from one iPad to another before, so I understand that process, but I'm currently playing RS on my iPad and I own an android phone. I currently have RS installed on my phone with another Storm8 account, and I see that I can log on to my android phone as my iPad ID name to play my main game on my phone. But it uses the word transfer - do you want to transfer all your Storm8 games to this device? My guestion is that if I log on to my phone, that will allow me to continue playing on my iPad, and therefore play the same account on both iPad and android phone? I'm hesitant to try because I really don't want to mess up anything. Can you give some advice? From my experience you can definitely play simultaneously on two Apple devices (although it has to be careful with syncing) but I'm not too clued up on Android so can't offer any insight there. I wasn't actually sure that Android had the in-game transfer option at all! Obviously simultaneous play between Apple and Android devices can spark questions when there is a separate, later release for Android that we saw this past week. My best advice is to contact TeamLava via support@teamlava.com.Do share any answer!:). To keep you updated on this issue; I did go ahead and log on to my Android phone. And for interest in will let you know how it went; As you mentioned, there are some sync issues. The worst of these is when you have them both open at the same time, or go from one to the other with not much of a time break in between (I guess this is pretty much the same with two iOS devices as well). Thanks for the update. I've had serious sync problems with other games (not TeamLava) in the past when not leaving much time between plays on different devices, so am well used to taking care on this front. Farm frenzy 2 walkthrough product street 7. Sometimes forcing to close the app when you're done playing (not sure if this is possible on Android) can help prevent synchronization issues. The past case pop-ups are something I've read off on the TL Forum but had no idea what they were. Now everything makes sense - it's an Android problem only. And a very annoying one of the sounds of it. I think TL has been informed of this, but aren't sure they consider it a problem.;) As for the extra gems, were they for games you had already downloaded (and thus got bonus gems earlier) or for new ones? I ask for when you transfer over, all your TeamLava go with you, which is why I have not had such a gap.:). The following is specific for Android users. When downloading a special edition of a TeamLava game (at least with the games) the content specific to that release is effectively transferred to your account. You can then use any edition of the game and make the content there. If you're on iOS then things are a little more complicated. But there hasn't been a new release on iOS for a long time (the Christmas version released this week is a glitch – it's actually just an update to the regular release, not a new app).:). Can you please help? I've had a lot of technical problems with restaurant history lately, and I've emailed teamlava 3 times. when I was at level 34 I went in appliances and it took 49 gems to me, as I didn't need another stove. oven. grill. etc. because im doing chili challenge. im almost at level 37 now as I know I can get another device, I don't know what to do as theu hasn't come back to me.just a general email saying it's experiencing high volume of emails.it's been 6days.late them 3emails.do you have another suggestion? I have HSD other issues but it's a com anf coin I vsn earn back.i had to buy these gems, so yes I have a question with it. Email TeamLava is the only way to try to make up for the lost gems, although they don't tend to be too generous with refunds for accidental gem buys. I hope you made a point to indicate that you bought gems with real money – you never know but this can tip the balance! And I've read of players getting gems back when it's the first time they've accidentally spent gems, so theirs is a bit of hope. In the end, all you have to do is wait. Sometimes TeamLava can be quite slow with their responses to emails, so just keep going there and they should respond eventually.:). I have two questions to ask about boxes/chest.1) Will I get a new item every time I open a particular box? Or is it possible that the same item can be repeated?2) I see that some items are outside the box for fewer gems. Like the picnic box, for example. The picnic basket is available for 15 beads. So the same item can be opened in the box even if I buy it outside the box right? I'm sorry if you've been asked the same questions already but it would be great if you could help. I expect support to get back to you eventually, but there is a possible process that you can implement in the meantime. I don't know if your sister has an account on the Storm8 Forum, but if she does, you can use her email to send a password reset request via this link:not then it looks like you have to sit tight! You can always try to send a memo to KookyPanda over on the forum (she's forum moderator) and she might be able to speed up your ticket. Otherwise just be patient!:). Thanks! To have 10 million coins is very nice! At the end of the day, the expansions are the really expensive buy in the game, so I wouldn't worry about the cost of other items such as counters. They can only make a dent in a 10 million budget. I would really look at doing 1 coin expansion given your Balance. I can't be sure, but I think the next one after that is 2.5 million? I'd probably go for that too! As long as you see something like 2-3 million coins in reserve, you should be covered for all eventualities (e.g. An expensive update or target set).:). I'm sorry about this long and confusing. I started playing RS a couple of years back. I was level 70. I played it and bakery story and fashion history on the iPad and my android phone. Then one day. I logged on to my phone and restaurant history had started right at the beginning. But it was good on my iPad. So I just kept playing it on it, and uninstalled it from my phone. Since 2 days ago, the iPad is updated. And I found that was also back in the beginning. It is clear from what I can find on range of groups etc, I never opened it on Facebook before the update. So I may have lost everything I was level 70 something and had spent real money on it. It didn't seem to matter what I did.I couldn't get it back. So I just installed it on my phone. It's another one again. Right back at the beginning, so I can't get my original restaurant back, or the new iPad version back. Bakery story and fashion history is perfectly fine and dandy on both devices. Can you help? S8 has not responded to my messages: (or e-mail messages: (. You are not alone with this problem, and the most important thing to note is that your game has not been lost - your progress is saved on Storm8 servers. It's just a matter of finding a way to get it back. The first port of call is Game Center. Try logout of it (go to Settings Game Center). Then make sure the game has been power closed (double point the home button and scroll rs away), log back into game center. If you are lucky your original game will be waiting for you. If this doesn't work, try playing the fresh level 1 game. I actually went through a very similar situation with BS2 earlier this week, and when I leveled up to level 2 the game updated and uploaded my original account. So definitely give it a go. If that fails, there's not much more I can say. Usually I suggest that players get in touch with the Storm8 support team, but you've already done that and like you I've had limited success in the past in even getting an answer out of them. This bug is a real mess and seems to have affected a lot of players big time. Hope you get it sorted one way or another!:). Until the account transfer feature was added to the game (it has since been removed) setting a password was only necessary to access Storm8 Forum. So chances are that your husband's account has not disappeared into nothingness due to the lack of a password! When it comes to getting it back, is his phone running iOS? If so, it's possible he could sign in via Game Center if he had linked his game up with it. Otherwise, you better just continue to get in touch with Storm8 – they are not the best at responding so just keep to them and hopefully they will offer some support.:). A Sonic Grill will reduce the cooktime of recipe recipes by two hours. Personally, I don't see this as very useful – if you wouldn't buy an entire bank of Sonic Grills then you won't get the full effect of the shorter cooking time. I'm not sure what size your restaurant is, but expanding with gems is really something good about players doing. But I would recommend waiting until you reach some of the later expansions where the cost in coins in astronomical – for example, my next expansion is 26x29 and requires 22.5 million coins! At the end of the day, it really is your choice. Personally, I just spend my gems on interior design that expands with coins will always be an option, although the sums needed can be daunting!:). Have you put a Storm8 ID and password in your old account? If so your progress will have been saved to Storm8' server then surely will still be there. These days, at least on iOS, your account is linked to Game Center, so if you use the same Apple ID as before you can access your game as long as you're signed in to Game Center. A Storm8 ID may not even be necessary for this. If you have any problems it would be best to submit a support form to Storm8 on you get your old game back!:). back!:).
